OBJECTIVE

Seeking a Software Developer position where I can apply my programming skills, technical knowledge, and passion for software development to build high-quality, innovative solutions.

SKILLS

Excellent programming and strong problem-solving skills. Willing to take challenges and learn new technologies. Familiar with software development lifecycle and configuration management.

- Languages: Java, Python, C/C++, C#, SQL, JavaScript, HTML.
- Operating Systems: Linux, iOS, VMware, Windows Server.
- Others: SQL Server Database, Apache Server, OpenVPN, TCP/IP Protocol, Web application.

EXPERIENCE

Software Engineer Intern, Roblox Corporation

(June 2026 - August 2026, San Mateo, CA)

- An application that lets users explore millions of 3D virtual worlds and experiences.
- A free toolset that allows developers and creators to build, publish, and operate their own experiences delivery.
- The backend infrastructure providing cloud services to power the desktops.

Software Engineer Intern, Zeta Associates (Lockheed Martin Corporation)

(May 2025 - August 2025, Fairfax, VA)

- Led the research, implementation, and deployment of an internal developer platform (IDP) leveraging Backstage.io, streamlining developer workflows and increasing efficiency.
- Improved developer self-service and service discoverability, leading to a notable increase in overall productivity and faster software delivery.
- Automated critical infrastructure tasks by connecting existing Ansible playbooks to the developer platform for Kubernetes cluster provisioning and software deployment on virtual desktops.

Software Developer Intern, Criterion Systems (Cherokee Federal Company)

(June 2024 - August 2024, Tysons Corner, VA)

- Utilizing AWS Connect to develop a Large Language Model (LLM) chatbot, along with Amazon Lex, Amazon Lambda, and Amazon API Gateway for the chatbot framework.
- Developed and maintained AI-powered chatbot systems, delivering efficient and accurate customer support.
- Proactively identified and resolved chatbot performance issues through continuous monitoring and rigorous testing, ensuring optimal functionality.
- Provided critical operational support, ensuring smooth execution of key business processes and initiatives.

EDUCATION

- Computer Science (**Master of Science**), University of Maryland
(August 2026 – May 2027 Expected, College Park, MD)

- Computer Science (**Bachelor of Science**), University of Maryland
(August 2023 – May 2026, College Park, MD)
